

SALISH SEA SCIENCE PROGRAM

October 19-21, 2018

Grade: 10-12

Cost: Free!

Join the **Ocean Wise Education** team as we explore the ocean literacy principles, the history, biodiversity and traditional knowledge of the Salish Sea. Challenge yourself in rope courses, explore the coast in kayaks (weather dependent), and discover intertidal creatures while tide pooling.

Students will develop an online learning resource to be uploaded to Ocean Wise's online learning environment, reflecting on their experience with the Salish Sea, and providing teachers with a tool to guide their class through ocean literacy.

To apply, visit education.ocean.org/youth
